## FOR IMMEDIATE RELEASE

### **Oliver Machinery Introduces the Industries only 220V 15" Benchtop Helical Cutterhead Planer.**

(SEATTLE, WA, January 15, 2025) Our 10055 15" Benchtop Planer combines everything we know about building planers, from current and previous generations, and adds to our already industry leading benchtop line-up.

We anticipate the new 10055 will be a category leader with the Oliver HCX Helical Cutterhead, increased cutting capacity, and powerful 2.5HP 1Ph 230V motor.

#### **The NEW 10055 Features:**

- Powerful 2.5HP 1Ph 12Amp 230V motor
- 2-Speed gearbox provides 12 or 20 FPM feed rates
- 4-post design ensures cutter head alignment to table
- Oliver HCX Helical Cutterhead (not segmented or spiral)
- Oliver DRO for precise material removal
- Large 15" x 23" table size with included extension tables
- 4-depth stops allow easy set-up from 1/4" to 1"
- Elevation crank with lock includes an easy-to-read scale
- 4" Dust port to evacuate shavings
- Blower assists in chip ejection during operation
- Safety switch features overload protection and lock-out
- CSA listed

**About Oliver Machinery:** Founded in the late 1800's by Joseph W. Oliver and under the current ownership since 1999, Oliver Machinery is a leader in woodworking technology. Committed to delivering innovative and high-quality machines designed to meet the needs of professionals and hobbyists alike. Our products are engineered with precision, durability, and user convenience in mind, ensuring superior performance and reliability.
